CNBM Roofing System

CBMI CONSTRUCTION is affiliated to CNBM Group which is the largest manufacturer for building materials and an integrated service provider leading throughout the world and has been listed in the Fortune Global 500 for eleven consecutive years. **CNBM ROOFING** systems have been marketed and installed around the world since 2014. Manufactured to Chinese and international quality standards, **CNBM ROOFING** products are tested to comply with or exceed current building codes and regulations, while offering classic beauty, elegance and architectural details.

OVERVIEW OF THE ROOFING SYSTEM

As a sub-project of housing construction, through the use of advanced scientific roof structure design, the roof structure consisting of roof trusses, superstructure panels and waterproof layer connectors. It is engineered for multi-functions of reinforcing, waterproofing, ventilation, drainage and energy saving. The system engineering includes design, manufacture, installation and maintenance of the entire building roofing system.

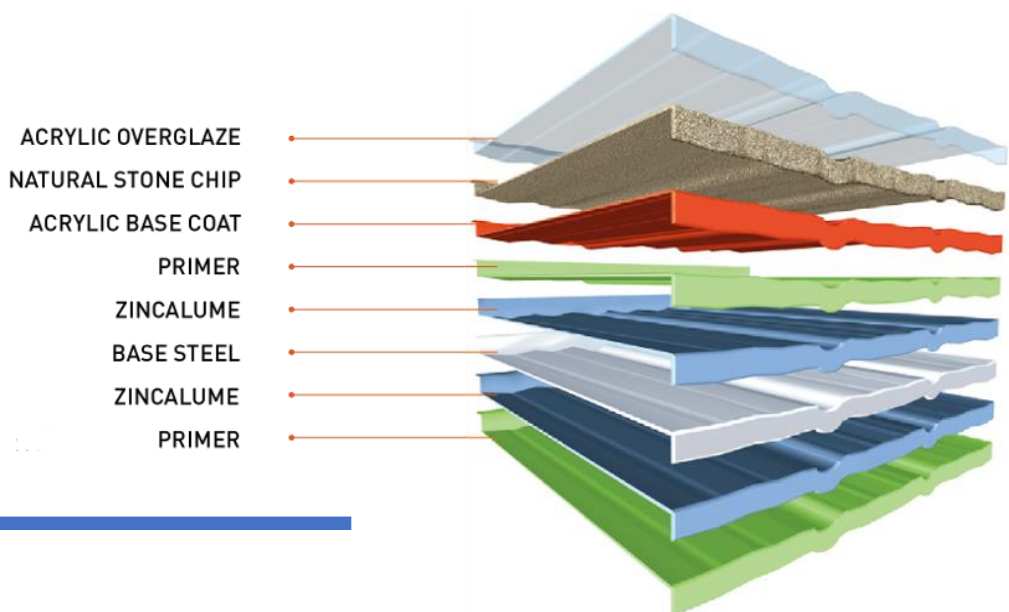

- ★ Applicable to steel, wood and cement structures of new villa/commercial buildings.
- ★ Also suitable for the flat to slope conversion of existing buildings, old roof renovation etc.

- Lightweight and sturdy 40-year warranty
- Double waterproof Double Guarantee
- Ventilation and dehumidification Simple construction
- Full dry operation Fast construction
- Economical and beautiful Easy maintenance

COLORED STONE COATED METAL ROOFING TILES

CNBM colored stone-coated metal tiles are manufactured with aluminum-zinc-plated steel plate which has an excellent anti-corrosion performance, water-based acrylate, sintered colored sand as the surface layer, and extremely strong resistance acrylic resin as the outermost layer. Compared with traditional tiles, they have excelled with strong weather resistance, heat and sound insulation. CNBM's interlocking tiles are non-combustible and energy efficient with a lifetime of more than 40 years.
